SUBJECT INDEX: VOLUME 52

Abstracts
South African Association of Physicists in Medicine and Biology, selected abstracts of papers presented at the Annual Congress of the, 18-21 March 1986, Pretoria, South Africa 111
Accelerators
Dosimetry, personal, in a mixed field of high-energy muons and neutrons 813
Stanford Linear Accelerator Center pulsed x-ray facility 463
Accelerators, medical
Neutron Contamination of Medical Electron Accelerators (NCRP Report No. 79) (book review) 239
Shielding design for the ceiling of a 6-MV accelerator in an existing facility 491
Accidents, reactor
Neutron doses following criticality accidents, uncertainties associated with using quick-sort techniques to estimate 65
Nuclear reactor accident, using cost/risk procedures to establish recovery criteria following a 157
Actinides
Distribution in the human skeleton 179
ALARA
Radiation protection aspects of the Sequoyah Nuclear Plant thimble tube ejection 223
Amang
Struverite, gamma activity in 379
Americium
Cancer incidence and lifespan vs. alpha-particle dose in beagles 617
Plutonium and Am contamination of tourist property and estimated inhalation intake of visitors to Kiev after the Chernobyl accident 793
Americium-241
Actinide distribution in the human skeleton 179
Atomic bomb survivors
Atomic bomb survivors residing in the United States, delayed effects of low-dose radiation on cellular immunity 585
Exposed to low-level radiation, dose-response analyses among 645

Bioassay
Systemic burden of Pu from urinalyses, a method for estimating 337
Biokinetics
Actinide distribution in the human skeleton 179
Bones
Concentrations of Pu-239 and Pu-240 in tissues of a beagle, distribution of low-level 373

Cadmium
Growth hormesis: a by-product of control 543
Calcium alginate
Radiostrontium absorption, reduced, in a human subject treated with composite treatment for mixed fission product contamination 371

Calibration
Calibrating survey meters, use of Tc-99m for 83
Holder for uncovered high-activity radionuclide sources of alpha particles and fission fragments 381
Cancer, lung
Age-dependent lung doses from ingested Rn-222 in drinking water 149
Cigarette smoke and 213
High-LET radiation, tests of the linear, no-threshold dose-response relationship for 629
In U.S. uranium miners, quantitative risk assessment of 417
Plutonium and lung cancer 625
Radon progeny exposure, smoking and bronchogenic carcinoma, reply to comments on (letter to the editors) 497
Radon progeny, smoking and bronchogenic carcinoma, comment on an epidemiological analysis of the relationship between exposure to (letter to the editors) 497
Radon risk estimates in NCRP Report No. 77, more comments on (letter to the editors) 237
Risk of lung cancer from Rn in Chinese study (letter to the editors) 823
Carbon-14
Emission rates from a pressurized heavy water reactor, measurement of 787
Radwaste, deregulated solid biomedical, dose assessment from incineration of 325
Carcinogenesis
Assessing cancer risks at low radiation doses, epistemological problems in 675
Atomic bomb survivors exposed to low-level radiation, dose-response analyses among 645
Atomic bomb survivors residing in the United States, delayed effects of low-dose radiation on cellular immunity 585
BEIR relative risk model for explaining atomic-bomb survivor cancer mortality, alternatives to the 55
Cancer incidence and lifespan vs. alpha-particle dose in beagles 617
Cigarette smoke and lung cancer 213
Conference on radiation hormesis: an overview (preface) 519
Continuous irradiation, adaptation of cell renewal systems under 561
Does radiation exposure produce a protective effect among radiologists? 637
Growth hormesis: a by-product of control 543
Health effects of ionizing radiation: Dr. Sagan's paradigms (letter to the editors) 679
High-LET radiation, tests of the linear, no-threshold dose-response relationship for 629
Induction of Thyroid Cancer by Ionizing Radiation (NCRP Report No. 80) (book review) 239
Ionizing radiation, the health effects of, reply to Dr. Gofman's comments on 680
Linear energy transfer, dose rates and doses for radiation hormesis, critical values of 671
Low-dose, low-LET irradiation, intracellular stimulation of biochemical control mechanisms by 663

Carcinogenesis (continued)
Low-level ionizing radiation studies in mice and guinea pigs, a review of 593
Lung cancer in U.S. uranium miners, quantitative risk assessment of 417
Microdosimetric concepts applied to hormesis 659
Physiology of the hormetic effect 549
Plutonium and lung cancer 625
Pseudoscience (letter to the editors) 103
Pseudoscience: in reply (letter to the editors) 103
Quality Factor in Radiation Protection (ICRU Report 40) (book review) 391
Radiation carcinogenesis in humans: is it necessary to revise exposure dose limits based on recent estimates of lifetime risks? 753
Radiation hormesis (editorial comment) 517
Radiation hormesis: its expression in the immune system 517
Radiation, environmental, and cancer in India 653
Radon progeny exposure, smoking and bronchogenic carcinoma, reply to comments on (letter to the editors) 497
Radon progeny, smoking and bronchogenic carcinoma, comment on an epidemiological analysis of the relationship between exposure to (letter to the editors) 497
Risk of lung cancer from Rn in Chinese study (letter to the editors) 823
What is hormesis and why haven't we heard about it before? (guest editorial) 521

Cesium-137
Body burden in Norwegian Lapps, 1965-1983 171

Chelation
Radiostrontium absorption, reduced, in a human subject treated with composite treatment for mixed fission product contamination 371

Chernobyl
Plutonium and Am contamination of tourist property and estimated inhalation intake of visitors to Kiev after the Chernobyl accident 793

China, People's Republic of
Risk of lung cancer from Rn in Chinese study (letter to the editors) 823

China, Republic of
Cosmic-ray ionization in the lower atmosphere 347
Terrestrial gamma radiation in Taiwan, measurements of 805

Chromosome aberration
Atomic bomb survivors exposed to low-level radiation, dose-response analyses among 645

Cigarettes
Lung cancer and 213
Radon progeny exposure, smoking and bronchogenic carcinoma, reply to comments on (letter to the editors) 497
Radon progeny, smoking and bronchogenic carcinoma, comment on an epidemiological analysis of the relationship between exposure to (letter to the editors) 497

Citations
References. Editors' Page 7

Computed tomography
Introduction to Emission Computed Tomography, edited by E.D. Williams (book review) 239
Radiological physics, misconceptions of medical students about (letter to the editors) 106
Concentration ratio
Of natural U for cattail pollen 233
Contamination, external
Plutonium and Am contamination of tourist property and estimated inhalation intake of visitors to Kiev after the Chernobyl accident 793
Contamination, internal
Determining picogram quantities of U in human urine by thermal ionization mass spectrometry 331
General Concepts for the Dosimetry of Internally Deposited Radionuclides (NCRP Report No. 84) (book review) 393
Naturally occurring alpha-emitting isotopes of U in the human skeleton, macro-distribution of 769
Inhalation intake, estimated, of visitors to Kiev after the Chernobyl accident and contamination of tourist property by Pu and Am 793
Post-therapy body retention of I-131, evaluation of external monitoring versus urine assay for determining 819
Radiostrontium absorption, reduced, in a human subject treated with composite treatment for mixed fission product contamination 371
Systemic burden of Pu from urinalyses, a method for estimating 337
Copper
Growth hormesis: a by-product of control 543
Corrections
Correction for "Biometric estimation of chest wall thickness of females," Health Phys. **49**, 419-424 395
Correction for "RADFOOD--a dynamic model for radioactivity transfer through the human food chain," Health Phys. **50**, 721-737 501
Cost-benefit analysis
Cost/risk procedures to establish recovery criteria following a nuclear reactor accident 157
Health detriment cost evaluation, towards a general model of 91

De minimis
Radiation protection in a pluralistic society. Guest editorial 13
Detector, liquid scintillation
Handbook of Radioactivity Measurement Procedures (NCRP Report No. 58) (book review) 240
Detectors, radiation
Cosmic-ray ionization in the lower atmosphere 347
Holder for uncovered high-activity radionuclide sources of alpha particles and fission fragments 381
Dogs
Cancer incidence and lifespan vs. alpha-particle dose in beagles 617
Concentrations of Pu-239 and Pu-240 in tissues of a beagle, distribution of low-level 373
Dose equivalent
Air concentrations of Pu-239 and Pu-240 and potential radiation doses to persons living near Pu-contaminated areas in Palomares, Spain 453

Dose, absorbed
Dosimetry of aqueous P-32 after soft-tissue infiltration following attempted intravenous administration 87
Experimental Basis for Absorbed-dose Calculations in Medical Uses of Radionuclides (NCRP Report No. 83) 393
Quality Factor in Radiation Protection (ICRU Report 40) (book review) 391
Dose, extremity
Definition, standards and regulatory limits, radiobiological significance, measurement and practical considerations (review article) 695
Dose, population
Worldwide medical radiation use, analytical modeling of 133
Dose, radiation
Dose assessment from incineration of deregulated solid biomedical radwaste 325
Radiation carcinogenesis in humans: is it necessary to revise exposure dose limits based on recent estimates of lifetime risks? 753
Radiation dose and image quality in mammography, a survey of, an ongoing program in Italy 437
Rare earth infiltration, effect of, on patient exposure, dose reduction, and image quality in oral panoramic radiology 17
Dosimeter, personnel
Radon daughter personal dosimeter, an integrating thermoluminescent 143
Dosimetry
General Concepts for the Dosimetry of Internally Deposited Radionuclides (NCRP Report No. 84) (book review) 393
Dosimetry, beta
Survey-instrument design for accurate 485
Dosimetry, chemical
Techniques of Radiation Dosimetry, edited by K. Mahesh and D.R. Vij (book review) 392
Dosimetry, neutron
Serendipitous dosimetry--an opportunity and an opportunity lost 219
Dosimetry, personnel
In a mixed field of high-energy muons and neutrons 813
Extremity dose: its definition, standards and regulatory limits, radiobiological significance, measurement and practical considerations (review article) 695
Serendipitous dosimetry--an opportunity and an opportunity lost 219
Dosimetry, radiation
Techniques of Radiation Dosimetry, edited by K. Mahesh and D.R. Vij (book review) 392
Dosimetry, thermoluminescent
Attaching thermoluminescent dosimeters to small mammals, comments on an alternative technique for (letter to the editors) 389
Attaching TLDs to small mammals, reply to comments on an alternative technique for (letter to the editors) 389
Data, environmental, at a nuclear power station to estimate detection limits for radiation exposure due to station operation, use of 775
Extremity dose: its definition, standards and regulatory limits, radiobiological significance, measurement and practical considerations (review article) 695

Dosimetry, thermoluminescent (continued)
Of gamma rays from the Hiroshima atomic bomb at distances 1.27 to 1.46 kilometers from the hypocenter 443
Radon daughter personal dosimeter, an integrating thermoluminescent 143
Techniques of Radiation Dosimetry, edited by K. Mahesh and D.R. Vij (book review) 392

Electricity
Meeting Energy Challenges, edited by C.B. Smith, T. Davis and P.W. Turnbull (book review) 826
Power to Our Grandchildren by George William Campbell (book review) 394

Electron spin resonance
Techniques of Radiation Dosimetry, edited by K. Mahesh and D.R. Vij (book review) 392

Emergency planning
An Introduction to Radiation Protection (3rd edn) by Alan Martin and Samuel A. Harbison (book review) 499
Neutron doses following criticality accidents, uncertainties associated with using quick-sort techniques to estimate 65
Nuclear reactor accident, using cost/risk procedures to establish recovery criteria following a nuclear reactor accident 157

Emissions, atmospheric
Data, environmental TLD, at a nuclear power station to estimate detection limits for radiation exposure due to station operation 775
Interception and retention of Pu-238 deposition by orange trees 707
Nuclear reactor accident, using cost/risk procedures to establish recovery criteria following a 157
Radon-222 emanation coefficient of coal fly ash, theoretical evaluation of 297
Screening Techniques for Determining Compliance with Environmental Standards (NCRP Commentary No. 3) (book review) 393
Waste streams of coal-fired utilities, partitioning of natural radionuclides in the 311

Errata
Correction for "Biometric estimation of chest wall thickness of females," Health Phys. **49**, 419-424 395
Correction for "RADFOOD—a dynamic model for radioactivity transfer through the human food chain," Health Phys. **50**, 721-737 501

Excretion, urinary
Determining picogram quantities of U in human urine by thermal ionization mass spectrometry 331
Elimination of I-131 in meadow voles (Microtus pennsylvanicus) measured by whole-body gamma spectrometry 481
Systemic burden of Pu, a method for estimating from urinalysis 337

Exposure, occupational
During maintenance activities at nuclear power plants in Japan 367
Extremity dose: its definition, standards and regulatory limits, radiobiological significance, measurement and practical considerations (review article) 695
Guide to Radiation Protection in the Use of X-Ray Optics Equipment (Occupational Hygiene Monograph 15) (book review) 825

Exposure, occupational (continued)
Radon progeny exposure, smoking and bronchogenic carcinoma, reply to comments on (letter to the editors) 497
Radon progeny, smoking and bronchogenic carcinoma, comment on an epidemiological analysis of the relationship between exposure to (letter to the editors) 497
Separating organic material from mineral bone in individuals occupationally exposed to Pu, evaluation of a technique for 763
Sequoyah Nuclear Plant thimble tube ejection, radiation protection aspects of the 223
Shielding design for the ceiling of a 6-MV accelerator in an existing facility 491

Fallout
Cesium-137 body burden in Norwegian Lapps, 1965-1983 171
Contamination of tourist property by Pu and Am, and estimated inhalation intake of visitors to Kiev after the Chernobyl accident 793
Interception and retention of Pu-238 deposition by orange trees 707
Radionuclide ingestion after deposition, PATHWAY: a dynamic food-chain model to predict 717
U.S. Army fallout prediction model, an evaluation of the 739

Ferrihexacyanoferrate(II)
Radiostrontium absorption, reduced, in a human subject treated with composite treatment for mixed fission product contamination 371

Fly ash, coal
Radon-222 emanation coefficient of, theoretical evaluation of 297
Waste streams of coal-fired utilities, partitioning of natural radionuclides in the 311

Greece
Radon-222 emanation coefficient of coal fly ash, theoretical evaluation of 297

Health Physics Society
Distinguished Scientific Achievement Award, 1986--Victor P. Bond 257

Obituary. Edward L. Alexander (1925-1986) 11
Pollution, indoor air, gathering together resources (guest editorial) xvii (52:6)

Hiroshima
Atomic bomb survivors exposed to low-level radiation, dose-response analyses among 645
Atomic bomb survivors residing in the United States, delayed effects of low-dose radiation on cellular immunity 585
Atomic-bomb survivor cancer mortality, alternatives to the BEIR relative risk model for explaining 55
Thermoluminescence dosimetry of gamma rays from the Hiroshima atomic bomb at distances 1.27 to 1.46 kilometers from the hypocenter 443

Hormesis
Assessing cancer risks at low radiation doses, epistemological problems in 675
Atomic bomb survivors residing in the United States, delayed effects of low-dose radiation on cellular immunity 585
Cancer incidence and lifespan vs. alpha-particle dose in beagles 617
Chemically induced hormesis, the occurrence of 531
Conference on radiation hormesis: an overview (preface) 519
Continuous irradiation, adaptation of cell renewal systems under 561
Does radiation exposure produce a protective effect among radiologists? 637
Gamma radiation, very low chronic, or background radiation, influence on cell proliferation of exposure to 571
Growth hormesis: a by-product of control 543
Health effects of ionizing radiation: Dr. Sagan's paradigms (letter to the editors) 679
High-LET radiation, tests of the linear, no-threshold dose-response relationship for 629
Hormesis response in irradiated seed, factors controlling the 599
Hormetic effects in pharmacology: pharmacological inversions as prototypes for hormesis 527
Ionizing radiation, the health effects of, reply to Dr. Gofman's comments on 680
Linear energy transfer, dose rates and doses for radiation hormesis, critical values of 671
Low-dose, low-LET irradiation, intracellular stimulation of biochemical control mechanisms by 663
Low-level ionizing radiation studies in mice and guinea pigs, a review of 593
Low-level radiation, dose-response analyses among atomic bomb survivors exposed to 645
Microdosimetric concepts applied to 659
Physiology of the hormetic effect 549
Plutonium and lung cancer 625
Pseudoscience (letter to the editors) 103
Pseudoscience: in reply (letter to the editors) 103
Radiation hormesis (editorial comment) 517
Radiation hormesis in plants 607
Radiation hormesis: its expression in the immune system 517
Radiation, environmental, and cancer in India 653
Sigmoid growth and the assessment of hormesis: a case for caution 553
What is hormesis and why haven't we heard about it before? (guest editorial) 521

Idaho
Radionuclide export by deer mice at a solid radioactive waste disposal area in southeastern 45

Imaging
Diagnostic x rays, marble attenuation characteristics for 385
Introduction to Emission Computed Tomography, edited by E.D. Williams (book review) 239
Mammography--A User's Guide (NCRP Report No. 85) (book review) 239
Physics in Medicine and Biology Encyclopedia by T.F. McAinsh (book review) 393

Imaging (continued)
Radiation dose and image quality in mammography, a survey of, an ongoing program in Italy 437
Radiological physics, misconceptions of medical students about (letter to the editors) 106
Rare earth infiltration, effect of, on patient exposure, dose reduction, and image quality in oral panoramic radiology 17
Immune system
Atomic bomb survivors residing in the United States, delayed effects of low-dose radiation on cellular immunity 585
Radiation hormesis: its expression in the 517
Incineration
Radwaste, deregulated solid biomedical, dose assessment from incineration of 325
India
Radiation, environmental, and cancer in 653
Ingestion
Determining picogram quantities of U in human urine by thermal ionization 331
Ingested Rn-222 in drinking water, age-dependent lung doses from 149
Intake of fallout Pu in Japan 193
Model for predicting food and water ingestion and inhalation rates of humans 353
Radionuclide ingestion after fallout deposition, PATHWAY: a dynamic food-chain model to predict 717
Age-dependent lung doses from ingested Rn-222 in drinking water 149
Inhalation
Air concentrations of Pu-239 and Pu-240 and potential radiation doses to persons living near Pu-contaminated areas in Palomares, Spain 453
Cigarette smoke and lung cancer 213
Determining picogram quantities of U in human urine by thermal ionization 331
Inhalation intake, estimated, of visitors to Kiev after the Chernobyl accident and Pu and Am contamination of tourist property 793
Lung cancer in U.S. uranium miners, quantitative risk assessment of 417
Lung model and fluctuations in air activity 229
Model for predicting food and water ingestion and inhalation rates of humans 353
Risk of lung cancer from Rn in Chinese study (letter to the editors) 823
International Radiation Protection Association
Peter Courvoisier (1915-1986), obituary 131
International System of Units
International System of Units. Editors' Page 3
SI Units in Radiation Protection and Measurements (NCRP Report No. 82) (book review) 239
Iodine-125
Radwaste, deregulated solid biomedical, dose assessment from incineration of 325
Iodine-131
Elimination of, in meadow voles (Microtus pennsylvanicus) measured by whole-body gamma spectrometry 481
Post-therapy body retention of I-131, evaluation of external monitoring versus urine assay for determining 819

Italy
Radiation dose and image quality in mammography, a survey of, an ongoing program in Italy 437

Japan
Exposures, occupational radiation, during maintenance activities at nuclear power plants in Japan 367
Ingestion intake of fallout Pu in 193
Thermoluminescence dosimetry of gamma rays from the Hiroshima atomic bomb at distances 1.27 to 1.46 kilometers from the hypocenter 443

Lasers
Field laser hazard calculations 27
Limits of the spectral ranges in the non-ionizing radiation (NIR) region of the electromagnetic spectrum, reply to comments on (letter to the editors) 390
Limits of the spectral ranges in the non-ionizing radiation region of the electromagnetic spectrum for classification and exposure limit determination, comments on (letter to the editors) 390

Lead-210
Deposition of Rn-222 daughter products, surface radioactivity resulting from 411

Linear energy transfer
Quality Factor in Radiation Protection (ICRU Report 40) (book review) 391

Magnetic resonance imaging
Radiological physics, misconceptions of medical students about (letter to the editors) 106

Malaysia
Struverite, gamma activity in 379

Mammography
Radiation dose and image quality in mammography, a survey of, an ongoing program in Italy 437
Mammography--A User's Guide (NCRP Report No. 85) (book review) 239

Metabolism
Elimination of I-131 in meadow voles (Microtus pennsylvanicus) measured by whole-body gamma spectrometry 481
Post-therapy body retention of I-131, evaluation of external monitoring versus urine assay for determining 819

Microwaves
Effects on energy absorption of orientation and size of animals exposed to 2.45-GHz microwave radiation 39

Mining, phosphate
Ground-water concentrations of Ra-226 and Rn-222 in North Carolina phosphate lands 361

Mining, uranium
Lung cancer in U.S. uranium miners, quantitative risk assessment of 417
Radium-226 and Rn emanation coefficients of particle-size fractions of alkaline, acid and mixed U mill tailings 303
Radon daughter personal dosimeter, an integrating thermolumines-cent 143
Radon progeny exposure, smoking and bronchogenic carcinoma, reply to comments on (letter to the editors) 497

Mining, uranium (continued)
Radon progeny, smoking and bronchogenic carcinoma, comment on an epidemiological analysis of the relationship between exposure to (letter to the editors) 497
Models
BEIR relative risk model for explaining atomic-bomb survivor cancer mortality, alternatives to the 55
Health detriment cost evaluation, towards a general model of 91
Lung model and fluctuations in air activity 229
Model for predicting food and water ingestion and inhalation rates of humans 353
Modeling, analytical, of worldwide medical radiation use 133
Potable water as a source of airborne Rn-222 in U.S. dwellings: a review and assessment 281
Radionuclide ingestion after fallout deposition, PATHWAY: a dynamic food-chain model to predict 717
Systemic burden of Pu from urinalyses, a method for estimating 337
Terrestrial food-chain model using natural analogs, evaluation of a 79
Monitoring, environmental
Attaching thermoluminescent dosimeters to small mammals, comments on an alternative technique for (letter to the editors) 389
Attaching TLDs to small mammals, reply to comments on an alternative technique for (letter to the editors) 389
Correlation between Ra-226 in soil, Rn-222 in soil gas, and Rn-222 inside adjacent houses 73
Cosmic-ray ionization in the lower atmosphere 347
Data, environmental TLD, at a nuclear power station to estimate detection limits for radiation exposure due to station operation 775
Determining Rn progeny levels in the atmosphere, optimizing the gross alpha counting method for 469
Screening Techniques for Determining Compliance with Environmental Standards (NCRP Commentary No. 3) (book review) 393
Transfer coefficient of Ra-226 from food to young weaned meadow voles, Microtus pennsylvanicus, in the laboratory 207
Monitoring, personnel
Exposures, occupational radiation, during maintenance activities at nuclear power plants in Japan 367
Extremity dose: its definition, standards and regulatory limits, radiobiological significance, measurement and practical considerations (review article) 695
Radiation protection aspects of the Sequoyah Nuclear Plant thimble tube ejection 223
Muons
Dosimetry, personal, in a mixed field of high-energy muons and neutrons 813

Nagasaki
Atomic bomb survivors exposed to low-level radiation, dose-response analyses among 645
Atomic bomb survivors residing in the United States, delayed effects of low-dose radiation on cellular immunity 585
Atomic-bomb survivor cancer mortality, alternatives to the BEIR relative risk model for explaining 55

Neutrons
Dosimetry, personal, in a mixed field of high-energy muons and neutrons 813
Neutron doses following criticality accidents, uncertainties associated with using quick-sort techniques to estimate 65
Nevada Test Site
Radionuclide ingestion after fallout deposition, PATHWAY: a dynamic food-chain model to predict 717
North Carolina
Ground-water concentrations of Ra-226 and Rn-222 in North Carolina phosphate lands 361
Public water supplies in, relationship between water-system size and Rn-222 concentration 69
Norway
Cesium-137 body burden in Norwegian Lapps, 1965-1983 171

Terrestrial food-chain model using natural analogs, evaluation of a 79
Transfer coefficient of Ra-226 from food to young weaned meadow voles, Microtus pennsylvanicus, in the laboratory 207
Model for predicting food and water ingestion and inhalation rates of humans 353

Obituary
Edward L. Alexander (1925-1986) 11
Peter Courvoisier (1915-1986) 131

Phosphorus-32
Dosimetry of aqueous, after soft-tissue infiltration following attempted intravenous administration 87
Radwaste, deregulated solid biomedical, dose assessment from incineration of 325
Plants
Hormesis response in irradiated seed, factors controlling the 599
Radiation hormesis in plants 607
Trees as indicators of subterranean water flow from a retired radioactive waste disposal site 201
Plutonium
Cancer incidence and lifespan vs. alpha-particle dose in beagles 617
Ingestion intake of fallout Pu in Japan 193
Plutonium and Am contamination of tourist property and estimated inhalation intake of visitors to Kiev after the Chernobyl accident 793
Plutonium and lung cancer 625
Separating organic material from mineral bone in individuals occupationally exposed to Pu, evaluation of a technique for 763
Systemic burden of Pu, a method for estimating from urinalysis 337
Plutonium-238
Interception and retention of deposition by orange trees 707
Plutonium-239
Actinide distribution in the human skeleton 179
Air concentrations of Pu-239 and Pu-240 and potential radiation doses to persons living near Pu-contaminated areas in Palomares, Spain 453
Concentrations of Pu-239 and Pu-240 in tissues of a beagle, distribution of low-level 373
Plutonium-240
Air concentrations of Pu-239 and Pu-240 and potential radiation doses to persons living near Pu-contaminated areas in Palomares, Spain 453
Concentrations of Pu-239 and Pu-240 in tissues of a beagle, distribution of low-level 373
Potassium iodide
Radiostrontium absorption, reduced, in a human subject treated with composite treatment for mixed fission product contamination 371
Power generation
Meeting Energy Challenges, edited by C.B. Smith, T. Davis and P.W. Turnbull (book review) 826
Power to Our Grandchildren by George William Campbell (book review) 392
Power plant, coal-fired
Radon-222 emanation coefficient of coal fly ash, theoretical evaluation of 297
Waste streams of coal-fired utilities, partitioning of natural radionuclides in the 311
Power plants, nuclear
An Introduction to Radiation Protection (3rd edn) by Alan Martin and Samuel A. Harbison (book review) 499
Data, environmental TLD, at a nuclear power station to estimate detection limits for radiation exposure due to station operation 775
Exposures, occupational radiation, during maintenance activities at nuclear power plants in Japan 367

Power plants, nuclear
Meeting Energy Challenges, edited by C.B. Smith, T. Davis and P.M. Turnbull (book review) 826
Power to Our Grandchildren by George William Campbell 394
Public information
Guest editorial. A little learning... 129

Quality factor
Quality Factor in Radiation Protection (ICRU Report 40) (book review) 391

Radiation protection
Handbook of Management of Radiation Protection Programs by Kenneth L. Miller and William A. Weidner (book review) 825
Radiation, alpha
Deposition of Rn-222 daughter products, surface radioactivity resulting from 411
Determining Rn progeny levels in the atmosphere, optimizing the gross alpha counting method for 469
Naturally occurring alpha-emitting isotopes of U in the human skeleton, macro-distribution of 769
Radiation, background
Gamma radiation, very low chronic, or background radiation, influence on cell proliferation of exposure to 571
Radiation, beta
Accurate beta dosimetry, a survey-instrument design for 485
Radiation, gamma
Measurements of terrestrial gamma radiation in Taiwan, Republic of China 805
Shielding of medical x and gamma rays by the NCRP Report No. 49 methods, a general solution to the 431
Struverite, gamma activity in 379
Thermoluminescence dosimetry of gamma rays from the Hiroshima atomic bomb at distances 1.27 to 1.46 kilometers from the hypocenter 443
Very low chronic or background radiation, influence on cell proliferation of exposure to 571
Radiation, low-level
Assessing cancer risks at low radiation doses, epistemological problems in 675
Atomic bomb survivors exposed to, dose-response analyses among 645
Atomic bomb survivors residing in the United States, delayed effects of low-dose radiation on cellular immunity 585
Cancer incidence and lifespan vs. alpha-particle dose in beagles 617
Conference on radiation hormesis: an overview (preface) 519
Continuous irradiation, adaptation of cell renewal systems under 561
Does radiation exposure produce a protective effect among radiologists? 637
Gamma radiation, very low chronic, or background radiation, influence on cell proliferation of exposure to 571
Growth hormesis: a by-product of control 543
Handbook of Radioactivity Measurement Procedures (NCRP Report No. 58) (book review) 240
Hormesis response in irradiated seed, factors controlling the 599
Ionizing radiation, the health effects of, reply to Dr. Gofman's comments on (letter to the editors) 680

Radiation, low-level (continued)
Linear energy transfer, dose rates and doses for radiation hormesis, critical values of 671
Low-dose, low-LET irradiation, intracellular stimulation of biochemical control mechanisms by 663
Microdosimetric concepts applied to hormesis 659
Physiology of the hormetic effect 549
Plutonium and lung cancer 625
Pseudoscience (letter to the editors) 103
Pseudoscience: in reply (letter to the editors) 103
Radiation hormesis (editorial comment) 517
Radiation hormesis in plants 607
Radiation hormesis: its expression in the immune system 517
Radiation, environmental, and cancer in India 653
Sigmoid growth and the assessment of hormesis: a case for caution 553
Studies of in mice and guinea pigs, a review of 593
What is hormesis and why haven't we heard about it before? (guest editorial) 521
Radiation, medical
Diagnostic x rays, marble attenuation characteristics for 385
Does radiation exposure produce a protective effect among radiologists? 637
Introduction to Emission Computed Tomography, edited by E.D. Williams (book review) 239
Mammography--A User's Guide (NCRP Report No. 85) (book review) 239
Physics in Medicine and Biology Encyclopedia by T.F. McAinsh (book review) 393
Radiation dose and image quality in mammography, a survey of, an ongoing program in Italy 437
Radiological physics, misconceptions of medical students about (letter to the editors) 106
Rare earth infiltration, effect of, on patient exposure, dose reduction, and image quality in oral panoramic radiology 17
Shielding design for the ceiling of a 6-MV accelerator in an existing facility 491
Shielding of medical x and gamma rays by the NCRP Report No. 49 methods, a general solution to the 431
Worldwide use, analytical modeling of 133
Radiation, non-ionizing
Biological Effects and Exposure Criteria for Radiofrequency Electromagnetic Fields (NCRP Report No. 86) (book review) 239
Field laser hazard calculations 27
Limits of the spectral ranges in the non-ionizing radiation (NIR) region of the electromagnetic spectrum, reply to comments on (letter to the editors) 390
Limits of the spectral ranges in the non-ionizing radiation region of the electromagnetic spectrum for classification and exposure limit determination, comments on (letter to the editors) 390
Microwave radiation (2.45 GHz), effects on energy absorption of orientation and size of animals exposed to 39
Radioactivity, natural
Correlation between Ra-226 in soil, Rn-222 in soil gas, and Rn-222 inside adjacent houses 73
Cosmic-ray ionization in the lower atmosphere 347

Radioactivity, natural
Determining Rn progeny levels in the atmosphere, optimizing the gross alpha counting method for 469
High-LET radiation, tests of the linear, no-threshold dose-response relationship for 629
Ground-water concentrations of Ra-226 and Rn-222 in North Carolina phosphate lands 361
Moisture and Rn-222 emanation 797
Natural radionuclides in the waste streams of coal-fired utilities, partitioning of 311
Pseudoscience (letter to the editors) 103
Pseudoscience: in reply (letter to the editors) 103
Radiation hormesis: its expression in the immune system 517
Radiation, environmental, and cancer in India 653
